

# AI Mentors for Student Projects: Spotting Early Issues in Computer Science Proposals

Gati Aher, Robin Schmucker,  
Tom Mitchell, Zachary C. Lipton

Carnegie  
Mellon  
University

## Problem

**Quick and early evaluation** of project proposals may help educators determine which students need more support to thrive in project-based learning.

Evaluating students project proposals is ***time-consuming*** and ***difficult to scale***

## Comparing LLMs-As-A-Judge and Human Expert Proposal Evaluation

**Skill Quality:** High Agreement

**Skill Pairings:** Low Agreement (hard to grade vague skills)

**Quality Checklist:** Slightly Low Agreement (GPT-4o is stricter)
